

We would like to invite you to the webinars of the European Science4Pandemics project on vaccines and clinical trials, which will take place in February and March.

The webinars are aimed at students aged 12-17 and will be led by the project's researchers. Help us to do science!

What is the format of the webinars?

- The webinars are **free** and **last one hour.**

- They will introduce the project, the concept of citizen science and why it is important for young people to participate in science

- Each session will **focus on one of the topics** of the studies we are coordinating: **vaccines or clinical trials**. You can pre-select the topic in the registration form.

- During the talk, we will spend some time explaining the **citizen science studies** and give students a chance to answer one of the questionnaires.

- At the end of the talk, students will be able to ask our researcher any questions or doubts they may have about the topic.

- You can choose which of the talks you would like to attend.

When will the talks take place?

- Thursday, February 23, from 10 to 11h (CET)
- Friday, March 3, from 11 to 12h (CET)
- Monday, March 6, from 10 to 11h (CET)
- Tuesday, March 14, from 11 to 12h (CET)
- Wednesday, March 22, from 10 to 11h (CET)
- Tuesday, March 28, from 11 to 12h (CET)

How can I register?

You can register using <u>this form.</u> You will be able to choose your preferred topic: vaccines or clinical trials.

What will I need during the webinar?

The webinar will be held **online** via **Zoom**, so you will need an **internet connection** and **a computer** to join it. If you have a large room with a projector and screen, you can all watch on the same screen. If your students have a computer, they can join the webinar on it.

During the webinar, it will be **necessary for all students to have a device** (computer, tablet or mobile phone) to be able to answer the questionnaire.

<u>Science4Pandemics (S4P)</u> is a European project funded by the <u>EIT Health</u> and coordinated by the <u>Fundació de Recerca Sant Joan de Déu</u> that has developed an educational game to better prepare young people for future pandemics by promoting resource management and decision-making skills, and improving knowledge of the characteristics of some infectious diseases.

We encourage you to take part in research through our citizen science studies!

Do not hesitate to contact us if you have any doubts.

Kind regards,

Science4Pandemics team
